```

Here you will require variables and the echo command with the trailing new line disabled.
I/O redirection will be required too (|)

```
 ~/final_sp_playground
→ bash script.sh

Here you will require variables
The script has to use the cd command
You will need to use the echo command
with the trailing new line disabled
The options of the ls command are:
Long list
Human readable
No group and no user (owner)
Time style
